

# Environmental Policy

**Aim:** It is the policy of DFX Technology Ltd to offer environmentally innovative products and to improve our environmental performance through sound business practices.

---

DFx Technology Ltd is based in Witney, Oxfordshire. DFX designs, manufactures and supplies electronic, energy saving products. We have an established reputation for quality, design and technical support and a proven commitment to developing energy efficient products.

DFX Technology Ltd aims for greater eco-efficiency in its business practices and in support of this has documented and implemented an environmental management system (EMS) meeting requirements of ISO 14001. The EMS supports our commitment to improve environmental performance and protection of the environment.

Our environmental objectives are focused on:

- Demonstrating compliance with legal and other relevant requirements applicable to our business and our products.
- Providing technically competent, total solutions to satisfy customer and market needs with particular emphasis on sustainability.
- Minimising waste through application of the waste hierarchy i.e. Eliminate, Reduce, Reuse, Recycle.
- Product planning and designing for longer product life and easier recycling (lifecycle perspective).
- Reduction of energy consumption in manufacturing and site activities.
- A desire to seek proactively to improve the products and services we provide.

In its business operation DFX Technology Ltd is committed to improvement of environmental performance and we will work in conjunction with our staff, supply chain and interested parties to ensure the requirements of this policy are fully implemented.
